

Development Permit Application Form

The Zoning Bylaw provides for permitted and discretionary forms of development in each zoning district. Every person is required to obtain a development permit before commencing any construction or use of land except as provided within the bylaw.

The following forms of development do not require a development permit:

1. agricultural operations excluding intensive agriculture and Intensive livestock;
2. the erection of any fence, wall, gate;
3. the erection of a single residence wind turbine, satellite dish, television antennae, or radio antennae;
4. the construction or placement of a temporary building, the sole purpose of which is incidental to the erection or alteration of a building for which a building permit has been granted;
5. internal alterations and maintenance to a residential building, provided that the use, building footprint or intensity of use of the building including the number of dwelling units within the building or on the site does not change;
6. landscaped areas, driveways and parking lots, provided the natural or designed drainage pattern of the site and adjacent sites are not adversely impacted; or
7. disposal of clean fill on a site where the clean fill is generated by construction or demolition activity on that site, subject to compliance with all federal and provincial requirements.

A building permit is separate from a development permit. A development permit acknowledges the use of land and buildings and its compliance with the Official Community Plan and Zoning Bylaw. A building permit refers to building construction and compliance with the National Building Code of Canada and is governed by the Municipal Building Bylaw.
